PROFILE SUMMARY

Software Engineer with 2+ years of experience designing and developing scalable backend applications, RESTful APIs, and cloud-based solutions. Experienced in application development, API integration, asynchronous programming, database design, and AWS cloud services. Proficient in Java, JavaScript (Node.js), Python, SQL, AWS, and backend application development. Strong understanding of SDLC, Agile methodologies, CI/CD, cloud architecture, and secure coding practices. Passionate about building reliable, scalable, and cloud-native applications.

EDUCATION

Sardar Vallabhbhai National Institute of Technology (SVNIT)

M.Tech in Computer Engineering, CGPA: 7.65

Surat, India

Jul. 2019 – Jul. 2021

Government Women Engineering College, Ajmer (GWECA)

Ajmer, India

B.Tech in Computer Science & Engineering, 73.7%

Aug. 2014 – May 2018

EXPERIENCE

Associate Software Engineer

Aug. 2021 – Sep. 2023

MeasureOne Solutions Pvt. Ltd.

- Developed and maintained scalable backend services and RESTful APIs for consumer data applications
- Built secure APIs with authentication, validation, and error handling
- Optimized backend performance, reducing data processing time by approximately 30%
- Automated document acquisition workflows using Puppeteer and asynchronous processing
- Integrated AWS services including S3 and CloudWatch for storage, monitoring, and logging
- Worked with SQL and MongoDB for efficient data storage and retrieval
- Collaborated in Agile teams, participating in sprint planning, code reviews, testing, and production support
- Used AI-assisted development tools to accelerate coding, debugging, documentation, and unit test creation while validating generated code for quality and security
- Investigated and resolved production issues through log analysis, monitoring, and debugging, improving application reliability

Software Developer Intern

Jan. 2021 – Jul. 2021

Jio Platforms Ltd.

- Developed RESTful APIs using Node.js for enterprise supply chain management applications
- Assisted in migrating relational databases to MongoDB and optimized database queries to improve scalability and API response times
- Supported development, testing, deployment, and maintenance of distributed backend services in Agile teams

PROJECTS

Smart Bookmark Manager | *Next.js, Supabase, Tailwind CSS, Google OAuth*

- Built a secure, real-time bookmark management application using Next.js and Supabase
- Implemented Google OAuth authentication, Row-Level Security (RLS), and real-time database updates for user-specific data
- Deployed the application using Vercel

Task Manager | *Vue 3, Pinia, Tailwind CSS*

- Developed a task management application using Vue 3 and Pinia with centralized state management and CRUD functionality
- Implemented task creation, editing, deletion, filtering, and state management functionality

TECHNICAL SKILLS

Languages: Java (Core), JavaScript (ES6+), Python, SQL

Frameworks: Node.js, Express.js, React.js, Vue 3, Next.js, Spring Boot

Backend: REST APIs, Microservices Architecture, Data Integration, Asynchronous Processing

Databases: MongoDB, MySQL, SQLite, PostgreSQL

Cloud: AWS (EC2, S3, CloudWatch, IAM)

DevOps & Tools: Docker, Kubernetes, Git, GitHub, Postman, Jira, Datadog

AI/ML: Generative AI, LLMs, AI-assisted Development, Prompt Engineering, GitHub Copilot, Cursor, Claude AI, ChatGPT

Methodologies: Agile, Scrum, SDLC, Code Review, Debugging, Root Cause Analysis
